

**YANGARRA RESOURCES LTD.**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS**

For the three months ended March 31, 2011

---

*Management's discussion and analysis ("MD&A") of the financial condition and the results of operations should be read in conjunction with the March 31, 2011 unaudited consolidated financial statements and the December 31, 2010 audited consolidated financial statements of Yangarra Resources Ltd ("Yangarra" or "the Company"), together with the accompanying notes.*

*Additional information about Yangarra filed with Canadian securities commissions is available on-line at [www.sedar.com](http://www.sedar.com).*

*The MD&A has been prepared using information that is current to May 25, 2011.*

*The financial information presented herein has been prepared on the basis of International Financial Reporting Standards ("IFRS"). Throughout this discussion, percentage changes are calculated using numbers rounded to the decimal to which they appear. All references to dollar amounts are in Canadian dollars.*

*On December 31, 2009, the Company acquired all of the issued and outstanding shares of Athabaska Energy Ltd. ("Athabaska"), a non-arm's length private corporation, in exchange for 10,000,001 common shares of the Company. On May 1, 2010, the Company and Athabaska were amalgamated and continued to carry on business under the name Yangarra Resources Ltd. At this time, the Company consolidated its common shares on a five old for one new (5:1) basis. All common share, warrant and stock option figures disclosed herein are presented on a consolidated basis.*

***BOE Presentation*** – *Production information is commonly reported in units of barrel of oil equivalent ("boe"). For purposes of computing such units, natural gas is converted to equivalent barrels of oil using a conversion factor of six thousand cubic feet to one barrel of oil. This conversion ratio of 6:1 is based on an energy equivalent wellhead value for the individual products. Such disclosure of boe may be misleading, particularly if used in isolation. Readers should be aware that historical results are not necessarily indicative of future performance.*

***Special Note Regarding Non-IFRS Measures*** – *This MD&A includes references to financial measures commonly used in the oil and gas industry. The terms "net petroleum and natural gas revenue" (petroleum and natural gas sales less royalties, production expenses and transportation costs) and "funds flow from operations" (net loss for the period adjusted for non-cash items in the statement of operations) are not IFRS measures and do not have standardized meanings prescribed by IFRS.*

***Forward-looking Statements*** – *Certain information regarding the Company set forth in this report, including management's assessment of the Company's future plans and operations, contain forward-looking statements that involve substantial known and unknown risks and uncertainties. These risks and uncertainties, many of which are beyond the Company's control, include the impact of general economic conditions and specific industry conditions, volatility of commodity prices, currency fluctuations, imprecision of reserve estimates, environmental risks, competition from other producers, the lack of available qualified personnel or management, stock market volatility and ability to access sufficient capital from internal and external sources. The Company's actual results, performance or achievements could differ materially from those expressed in, or implied by, these forward-looking statements, and accordingly, no assurance can be given that any events anticipated by the forward-looking statements will transpire or occur, or if any of them do, what benefits the Company can derive from such events.*

## **Company Description and Outlook**

Yangarra is a junior oil and gas company engaged in the exploration, development and production of natural gas and oil with operations in Western Canada, with a main focus on Central Alberta, where the Company has extensive infrastructure and land holdings.

Yangarra is dedicated to creating value for its shareholders through its commitment to a clear business strategy and performance objectives. The Company's strategy is to increase the value of its corporate assets through the drill bit and by assembling a large focused land base in Alberta that features high-quality, long-life light oil and liquids-rich gas reserves. The Company has assembled a significant future drilling inventory and will strive to grow this inventory through drilling, geology and strategic acquisitions.

During the quarter ended March 31, 2011 the Company completed the following significant milestones:

- Oil and gas sales during Q1 2011 were \$3.6 million and cash flow from operations was \$2.5 million (\$0.03 per share - basic) a 27% and 62% increase from the fourth quarter of 2010, respectively
  - Production increased by 13% from the fourth quarter
  - 42% of production was generated from oil and NGL's
  - 82% of our production came from the Willesden Green/Ferrier area
- Production and transportation costs dropped in 2011 by 21% on a dollar basis and by 29% on a per boe basis when compared to the fourth quarter of 2010.
  - Operating costs in the Willesden Green/Ferrier area were \$7.53/boe in the first quarter
- The Q1 2011 netback of \$37.95 per boe is a 32% increase from the \$28.84 per boe reported in the fourth quarter
- Capital expenditures of \$18.1 million. The focus of the Q1 capital program was the drilling of wells in Central Alberta.
  - \$14.2 million spent on the drilling and completion of 9 gross (4.0 net) wells as well as the completion and tie in of 2.0 (1.7 net) wells from the 2010 drilling program
  - \$1.3 million was spent on land increasing our future drilling inventory to 123 gross (70.0 net) locations, representing a 171% increase from year-end, on a net basis increased to 134 gross (78.0 net) after the end of the quarter
  - \$2.3 million spent on equipment purchases and infrastructure development during the quarter

### **Operations Update**

- Commenced work to bring the remaining 7 gross (2.2 net) wells that were drilled during the first quarter on production
  - 900 boe/d of flush production volumes will be added once complete
- Restarted the drilling program, which includes the drilling of 22 gross (10 net) wells during the remainder of 2011, focused in Central Alberta
- Continued to spend the land portion of the capital program
  - Additional locations added since March 31, 2011 now bring our total drilling location to 131 gross (78 net) a 202% increase from year-end on a net basis

**YANGARRA RESOURCES LTD.**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS**  
For the three months ended March 31, 2011

**Summary Financial Information**

	2011 Q1	Q4	2010 Q1
<b>Statement of Operations and Deficit</b>			
Net (loss) income for the period	\$ (2,230,631)	\$ (183,574)	\$ (147,119)
Net (loss) income per share - basic	\$ (0.03)	\$ 0.00	\$ 0.00
Net (loss) income per share - fully diluted	\$ (0.02)	\$ 0.00	\$ 0.00
Weighted average number of shares - basic	85,987,807	73,869,598	39,876,895
Weighted average number of shares - fully diluted	93,649,398	80,497,022	39,876,895
<b>Statement of Cash Flows</b>			
Funds flow from operations	\$ 2,535,251	\$ 1,567,756	\$ 410,168
Funds flow from operations per share - basic	\$ 0.03	\$ 0.02	\$ 0.01
Funds flow from operations per share - fully diluted	\$ 0.03	\$ 0.02	\$ 0.01

	2011 Q1	Q4	2010 Q1
<b>Balance Sheet</b>			
Property and equipment	\$80,990,090	\$63,263,452	\$40,987,140
Total assets	\$87,597,721	\$68,373,813	\$42,817,351

**Business Environment**

	2011 Q1	Q4	2010 Q1
West Texas Intermediate ("WTI") (US\$/bbl)	\$ 93.95	\$ 85.10	\$ 78.71
AECO gas (Cdn\$/GJ)	\$ 3.75	\$ 3.73	\$ 5.06
Foreign Exchange (Cdn\$/US\$)	\$ 0.986	\$ 1.013	\$ 1.041

Crude oil prices strengthened in the first quarter of 2011, with the West Texas Intermediate ("WTI") reference price averaging US\$93.95 per barrel compared to US\$85.10 per barrel in the fourth quarter of 2010. Demand for crude oil is generally tied to global economic growth, but is also influenced by factors such as political instability, market uncertainty, weather conditions and government regulations.

Oil prices in Canada are also affected by the Canada/US dollar exchange rate since the WTI reference price of oil is in US dollars. During 2011, the Canadian dollar strengthened against the US dollar, averaging Cdn\$0.986 to US\$1 compared with Cdn\$1.013 to US\$1 in the fourth quarter of 2010. The strengthening dollar partially offsets the increased WTI benchmark pricing experienced during 2011.

AECO natural gas prices for 2011 increased to \$3.75 per GJ from \$3.73 per GJ in the fourth quarter of 2010. Demand from the price sensitive power and industrial sectors and warm weather patterns in the Northeast part of the United States temporarily offset the strong incremental production from shale gas plays. Although natural gas prices have recovered compared to a weak 2009 price environment, strong US natural gas production is limiting the upside to natural gas price recovery.

**YANGARRA RESOURCES LTD.**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS**  
For the three months ended March 31, 2011

---

**Results of Operations**

**Net petroleum and natural production, pricing and revenue**

	2011 Q1	2010 Q4	2010 Q1
<b>Daily production volumes</b>			
Natural gas (mcf/d)	2,978	2,564	2,018
Oil (bbl/d)	258	260	9
NGL's (bbl/d)	86	54	13
Royalty income (boe/d)	23	19	-
Combined (boe/d 6:1)	863	761	358
<b>Product pricing</b>			
Oil (\$/bbl)	\$ 86.66	\$ 80.54	\$ 78.39
NGL (\$/bbl)	\$ 62.53	\$ 62.30	\$ 61.36
Gas (\$/mcf)	\$ 3.87	\$ 3.93	\$ 4.82
Combined (\$/boe)	\$ 46.70	\$ 40.94	\$ 31.30
<b>Revenue</b>			
Petroleum & natural gas sales - Gross	\$ 3,628,974	\$ 2,864,802	\$ 1,009,188
Royalty income	\$ 104,430	\$ 93,882	-
Royalty expense	\$ (143,368)	\$ (128,984)	\$ 40,588
Petroleum & natural gas sales - Net	\$ 3,590,036	\$ 2,829,700	\$ 1,049,776

Petroleum and natural gas sales increased by 260% in Q1 2011 to \$3.6 million from \$1.0 million in the same period 2010, the increase is attributable to:

- A49% increase in average product prices; and
- 141% increase in production (on a boe basis)

Compared to the fourth quarter 2010, petroleum and natural gas sales increased by 27%, the increase is attributable to:

- 14% increase in average product prices; and
- 13% increase in production (on a boe basis)

The increased production in 2011 can be attributed to the drilling program. 4.0 (3.68 net) additional wells that were brought on production in the first quarter of 2011. These wells have significantly higher rates than the Company's traditional gas wells in the Jaslan and Medicine Hat area and have resulted in significant production increases from the first quarter of 2010.

The overall average price earned by the Company was higher when compared to the same period in 2010 due to increased oil and natural gas liquids production (42% compared to 7% in 2010). The fourth quarter of 2010 was 42% oil and natural gas liquids production, equivalent to the first quarter of 2011. In addition, the price of WTI increased by 10% from the fourth quarter of 2010 further increasing the revenue from the oil and NGL production stream.

**YANGARRA RESOURCES LTD.**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS**  
For the three months ended March 31, 2011

**Production by area**

	2011 Q1	2010 Q4	2010 Q1
Production by area (boe/d)			
Willesden Green/Ferrier	681	546	54
Willesden Green/Ferrier - royalty income	23	19	-
Medicine Hat	70	87	94
Jaslan	80	98	206
Other	10	11	4
<b>Total</b>	<b>863</b>	<b>761</b>	<b>358</b>

On a boe basis, 82% of our production now comes from the Willesden Green/Ferrier area, compared to 15% in the same period in 2010 and 74% in the fourth quarter of 2010. This weighting is expected to further increase as the drilling portion of the 2011 capital budget will focus on this area.

**Royalty Income**

	2011 Q1	2010 Q4	2010 Q1
Royalty Income	\$ 104,430	\$ 93,882	-

The majority of the royalty income is a result of the 15% sliding scale royalty purchased in the Willesden Green area in March 2010. This royalty income will increase as production in the Willesden Green area increases.

**Royalty Expense**

	2011 Q1	2010 Q4	2010 Q1
Royalty Expense	\$ 143,368	\$ 128,984	\$ 40,588
Per boe	\$ 1.85	\$ 1.84	\$ 1.26
As a % of sales	4%	5%	4%

Royalties increased by 253% from \$40,588 in the first quarter 2010, and by 11% from \$128,984 in the fourth quarter 2010, to \$143,368 for Q1 2011. The increase reflects higher production during 2011.

Generally, royalty rates in western Canada are sensitive to prevailing commodity prices and individual well production rates. Royalties, as a percentage of revenues, were consistent from both Q1 and Q4 2010 to the first quarter in 2011.

The crown royalty rate on the new horizontal wells in Central Alberta is 5% for the earlier of 2 years or 60,000 boe of production.

**YANGARRA RESOURCES LTD.**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS**  
For the three months ended March 31, 2011

**Production and Transportation Costs**

	2011		2010	
	Q1	Q4	Q1	Q1
Production costs	\$ 571,841	\$ 738,831	\$ 272,876	
Per boe	\$ 7.36	\$ 10.56	\$ 8.47	
Transportation costs	\$ 69,621	\$ 72,990	\$ 48,893	
Per boe	\$ 0.90	\$ 1.04	\$ 1.52	

	2011		2010	
	Q1	Q4	Q1	Q1
<b>Operating costs for core areas (including transportation)</b>				
Willesden Green/Ferrier	\$ 7.53	\$ 8.91	\$ 13.94	
Medicine Hat	\$ 19.03	\$ 21.88	\$ 17.20	
Jaslan	\$ 10.56	\$ 8.31	\$ 6.37	

Production and transportation costs dropped in 2011 by 21% on a dollar basis and by 29% on a per boe basis when compared to the fourth quarter of 2010. This is due to increased production in areas with facilities in place and where the majority of the costs are fixed. When compared to the same period in 2010 operating costs on a dollar basis are higher due to increased volumes but have decreased on a per boe basis. Operating and transportation costs per boe in the Willesden Green/Ferrier area are expected to continue to decline as more production is brought on stream and fixed costs are shared over higher volumes.

**Operating Netback**

	2011		2010	
	Q1	Q4	Q1	Q1
Revenues	\$ 46.70	\$ 40.94	\$ 31.30	
Royalty income	1.34	1.34	-	
Royalty expense	(1.85)	(1.84)	(1.26)	
Production costs	(7.36)	(10.56)	(8.47)	
Transportation costs	(0.90)	(1.04)	(1.52)	
Netback per boe	\$ 37.95	\$ 28.83	\$ 20.05	

The Q1 2011 netback of \$37.95 per boe is an 89% increase from the \$20.05 per boe reported in the same quarter 2010, as well as a 32% increase from Q4 2010.

Netbacks were stronger due to higher oil and liquid sales and, therefore, higher relative prices to natural gas. The higher oil and liquid sales were a result of the Company's focus on Glauconite and Cardium wells in Willesden Green/Ferrier versus the gas-weighted Medicine Hat and Jaslan areas in 2009. The Company has also lowered operating costs as economies of scale are being realized in the Willesden Green/Ferrier due to increasing volumes.

**YANGARRA RESOURCES LTD.**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS**  
For the three months ended March 31, 2011

As the Company continues to focus drilling in Central Alberta it expects netbacks to continue to rise as a result of both the increased proportion of oil and liquids and the continued decrease in operation costs.

**Depletion, depreciation and accretion**

	2011 Q1	2010 Q4	2010 Q1
Depletion and depreciation	\$ 1,263,444	\$ 1,562,204	\$ 603,407
Per boe	\$ 16.26	\$ 20.11	\$ 18.73
Accretion	\$ 32,587	\$ 33,586	\$ 33,212

Depletion and depreciation decreased in 2011 compared to 2010 due to significant increases in the reserve base in the first quarter of 2011. The reserve base increased from the same period in 2010, which more than offset the increased production, resulting in an decreased DD&A rate per boe.

**Other expenses**

	2011 Q1	2010 Q4	2010 Q1
General and administrative expenses	\$ 275,291	\$ 380,831	\$ 223,379
Interest and financing fees	\$ 54,266	\$ 94,780	\$ 61,655
Dividends on preferred shares	\$ 8,960	\$ 12,603	\$ 12,329
Stock-based compensation	\$ 1,275,455	\$ 961,984	\$ 21,700

General and administrative expenses were lower in the first quarter of 2011 due to increased professional fees related to the year-end audit and legal fees related to year-end activities in fourth quarter of 2010.

Interest and financing fees for the three months ended March 31, 2011 is for interest on the revolving operating demand loan for which the average amount drawn in 2011 was 2,750,000. The drawn amount was reduced from the fourth quarter of 2010 as a portion of the debt was repaid with the proceeds of the March equity financing.

Dividends on preferred shares are at a rate of 5% payable semi-annually in cash or common shares of the Company on \$1,000,000 of preferred shares issued in December 2009 in conjunction with the settlement of the subordinated credit facility. The preferred shares were redeemed in March 2011 resulting in the reduced dividend paid for the first quarter of 2011.

During the three months ended March 31, 2011, the Company granted a total of 2,620,000 stock options which vested immediately. The total fair value of the options was estimated at \$1,818,600 of which \$1,275,455 was recognized as stock-based compensation expense ("SBC") and \$543,145 was capitalized to property and equipment.

**Commodity price risk contracts**

As at March 31, 2011, the Company was committed to the following commodity price risk contracts for the sale of oil:

- 100 barrels per day from February 1 to December 31, 2011 at a fixed price of \$94.00 CAD per barrel; and
- 100 barrels per day from February 1 to December 31, 2011 at a fixed price of \$93.85 CAD per barrel.

**YANGARRA RESOURCES LTD.**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS**  
For the three months ended March 31, 2011

---

In addition, the Company entered into collars which provided a floor and a ceiling for the price it received for oil as follows:

- 100 barrels per day from April 1 to December 31, 2011 at a floor price of \$95.00 CAD per barrel and a ceiling price of \$113.00 CAD per barrel;
- 100 barrels per day from April 1 to December 31, 2011 at a floor price of \$95.00 CAD per barrel and a ceiling price of \$114.00 CAD per barrel;
- 100 barrels per day from January 1 to December 31, 2012 at a floor price of \$95.00 CAD per barrel and a ceiling price of \$110.00 CAD per barrel; and
- 100 barrels per day from January 1 to December 31, 2012 at a floor price of \$95.00 CAD per barrel and a ceiling price of \$109.15 CAD per barrel.

The mark-to market on the hedges was in a loss position of \$846,431 as at March 31, 2011.

### **Liquidity and Capital Resources**

During the three months ended March 31, 2010, the Company generated \$2,535,251 of funds flow from operations compared to \$410,168 in the 2010 comparative period and \$1,567,756 in the fourth quarter of 2010. Funds flow from operations was higher for the 2011 period due primarily to the increase in petroleum and natural gas revenue.

As at March 31, 2011, the maximum amount available under the revolving operating demand loan was \$14,500,000 (December 31, 2010 – \$12,000,000) at an interest rate of bank prime plus 1.5% per annum, payable monthly, the interest rate was increased from bank prime plus 1.0% as the Company's net debt to trailing cash flow ratio is greater than 1 to 1.

As at March 31, 2011, the \$2,725,647 (December 31, 2009 – \$5,559,208) reported amount of bank debt was comprised of \$900,000 (December 31, 2010 – \$4,600,000) drawn on the revolving operating demand loan and \$1,825,647 (December 31, 2010 – \$959,208) of bank overdraft.

The Company is compliant with all debt covenants as at March 31, 2011.

As at March 31, 2011, the Company had a working capital deficit of \$11,600,177 compared to a deficit of \$11,472,461 at December 31, 2010. The Company reduced the debt balance with the proceeds from the March equity financing but has increased the payables balance due to the drilling of 9 gross (4.0 net) wells in the first quarter.

### **Capital Spending**

Capital spending is summarized as follows:

---

	2011	2010	
	Q1	Q4	Q1
Land and lease rentals	\$ 1,339,435	\$ 3,827,343	\$ 1,411,343
Drilling and completion	14,286,734	10,593,594	1,997,955
Geological and geophysical	170,632	190,640	125,432
Equipment	2,327,862	2,148,426	265,116
	<hr/>	<hr/>	<hr/>
	\$18,124,663	\$16,760,003	\$ 3,799,846

---

During the remainder of 2011 Yangarra will continue to advance its \$50 million capital budget focused in Central Alberta. The remainder of the drilling program includes 22 gross (10 net) wells with capital allocated to land and equipment.

---

**YANGARRA RESOURCES LTD.**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS**  
For the three months ended March 31, 2011

---

## Decommissioning Liabilities

As at March 31, 2011, the undiscounted fair value of the asset retirement obligation associated with the Company's existing properties was estimated to be \$5,323,837 for which \$3,675,618 has been recorded using a discount rate of 3.35%, an inflation rate of 2% and an estimated weighted average timing of cash flows of 11 years.

## Off Balance Sheet Arrangements

There were no off balance sheet arrangements, other than the office and truck lease commitment which is accounted for as an operating lease.

## Related Party Transactions

During the three months ended March 31, 2011 and 2010, the Company was charged or invoiced the following amounts by certain of its officers and directors and by companies controlled by certain of the Company's officers and directors:

		<i>2011</i>		<i>2010</i>
Administration and consulting fees	\$	51,000	\$	31,305
Production and capital expenditures	\$	69,240	\$	341,524

Included in accounts payable and accrued liabilities at March 31, 2011 is \$165 (December 31, 2010 – \$29,668) relating to the above transactions. These transactions were in the normal course of operations and were measured at the exchange amount, which is the amount of consideration established and agreed to by the related parties.

## Share Capital

Details of changes in the number of outstanding equity instruments are detailed in the following table:

	Common Shares	Preferred Shares	Warrants	Stock Options
<b>Balance - December 31, 2010</b>	<b>79,718,127</b>	<b>1,000,000</b>	<b>9,452,000</b>	<b>7,783,800</b>
Transfer agent correction	(70)	-	-	-
Financing March 2011	23,632,500	-	-	-
Grant of options	-	-	-	2,620,000
Exercise of options	260,000	-	-	(260,000)
Expiry of options	-	-	-	(15,000)
Exercise of warrants	184,000	-	(184,000)	-
Redemption of preferred shares	-	(1,000,000)	-	-
<b>Balance - March 31, 2011</b>	<b>103,794,557</b>	<b>-</b>	<b>9,268,000</b>	<b>10,128,800</b>
Exercise of warrants	12,500	-	(12,500)	-
<b>Balance - Date of MD&amp;A</b>	<b>103,807,057</b>	<b>-</b>	<b>9,255,500</b>	<b>10,128,800</b>

## Contingency

In December 2009, the Company terminated the Standstill Agreement that it had with an industry partner regarding a joint producing property and served that industry partner with a Statement of Claim issued from The Court of Queen's Bench of Alberta, by which the Company claims breach of the agreements

**YANGARRA RESOURCES LTD.**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS**  
For the three months ended March 31, 2011

---

between the parties, gross negligence and default of operator. The Company seeks judgment for specified and such further damages to be determined by the Court, as well as appointment as operator. The Company significantly increased the statement of claim based on the information provided by the defendant expects the matter to go to trial during 2012. The potential outcome of the lawsuit and claims are undetermined, however, they may be material. As the likely outcome of this litigation cannot be determined at this time, no provision has been made in the consolidated financial statements.

## **Commitments**

As at March 31, 2011, the Company has until December 31, 2011 to incur \$9,690,000 of qualifying flow-through expenditures related to the private placement of flow-through shares issued in May, June and October 2010, of which approximately \$4.8 million has been incurred. Drilling locations have been identified to satisfy the remaining expenditures.

The Company has entered into lease agreements for office premises, field equipment and Company vehicles with estimated minimum annual payments as follows:

2011	\$	139,178
2012	\$	185,571
2013	\$	109,695

## **Financial instruments and financial risk management**

The Company's financial instruments include cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities, bank debt, credit facility and preferred shares. The carrying values of accounts receivable, accounts payable and accrued liabilities, bank debt, credit facility and preferred shares approximate their fair values due to their relatively short periods to maturity.

The Company is required to classify fair value measurements using a hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy is as follows:

- Level 1 - quoted prices in active markets for identical assets or liabilities;
- Level 2 - inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly; and
- Level 3 - inputs for the asset or liability that are not based on observable market data.

The fair value of cash and bank debt is level 1 it is determined using amounts held at/lent by financial institutions.

The Company's risk management policies are established to identify and analyze the risks faced by the Company, to set appropriate risk limits and controls, and to monitor risks and adherence to market conditions and the Company's activities. The Company has exposure to credit risk, liquidity risk and market risk as a result of its use of financial instruments. This note presents information about the Company's exposure to each of the above risks and the Company's objectives, policies and processes for measuring and managing these risks. Further quantitative disclosures are included throughout these financial statements. The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Board has implemented and monitors compliance with the risk management policies as set out herein:

**YANGARRA RESOURCES LTD.**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS**  
For the three months ended March 31, 2011

---

**a. Credit risk**

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations. A substantial portion of the Company's accounts receivable are with natural gas and liquids marketers and joint venture partners in the oil and gas industry and are subject to normal industry credit risks. Purchasers of the Company's natural gas and liquids are subject to credit review to minimize the risk of non-payment. As at March 31, 2011, the maximum credit exposure is the carrying amount of the accounts receivable and accruals of \$5,245,375 (December 31, 2010 – \$3,752,477). As at March 31, 2011, the Company's receivables consisted of \$3,847,097 from joint venture partners and other trade receivables and \$1,398,278 of revenue receivable from petroleum and natural gas marketers.

Receivables from petroleum and natural gas marketers are typically collected on the 25th day of the month following production. The Company's policy to mitigate credit risk associated with these balances is to establish marketing relationships with large purchasers. The Company historically has not experienced any significant collection issues with its petroleum and natural gas marketers. All of the revenue accruals and receivables from petroleum and natural gas marketers were received in April and May 2011.

Joint venture receivables are typically collected within one to three months of the joint venture bill being issued to the partner. The Company mitigates the risk from joint venture receivables by obtaining partner approval of capital expenditures prior to starting a project. However, the receivables are from participants in the petroleum and natural gas sector, and collection is dependent on typical industry factors such as commodity price fluctuations, escalating costs and the risk of unsuccessful drilling. Further risk exists with joint venture partners as disagreements occasionally arise which increases the potential for non-collection. For properties that are operated by the Company, production can be withheld from joint venture partners who are in default of amounts owing. In addition, the Company often has offsetting amounts payable to joint venture partners from which it can net receivable balances.

The Company did not provide for any doubtful accounts nor was it required to write-off any receivables during the three months ended March 31, 2011. The Company would only choose to write-off a receivable balance (as opposed to providing an allowance) after all reasonable avenues of collection had been exhausted.

As at March 31, 2011, the Company considers its receivables to be aged as follows:

Not past due	\$	1,510,360
Past due by less than 90 days		1,665,890
Past due by more than 90 days		2,069,125
		<hr/>
	\$	5,245,375

**b. Liquidity risk**

Liquidity risk is the risk that the Company will incur difficulties meeting its financial obligations as they are due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions without incurring unacceptable losses or risking harm to the Company's reputation.

The Company prepares annual capital expenditure budgets, which are regularly monitored and updated as considered necessary. The Company uses authorizations for expenditures on both operated and non-operated projects to further manage capital expenditures.

# YANGARRA RESOURCES LTD.

## MANAGEMENT'S DISCUSSION AND ANALYSIS

For the three months ended March 31, 2011

---

To facilitate the capital expenditure program, the Company has a credit facility agreement, as disclosed in note 5, which is regularly reviewed by the lender. The Company monitors its total debt position monthly. The Company also attempts to match its payment cycle with collection of petroleum and natural gas revenues on the 25th of each month. The Company anticipates it will have adequate liquidity to fund its financial liabilities through its future cash flows. The Company's financial liabilities are comprised of accounts payable and accrued liabilities, bank debt and the credit facility, which have expected maturities of less than one year resulting in their current classification on the balance sheet.

### c. Market risk

Market risk consists of interest rate risk, currency risk and commodity price risk. The objective of market risk management is to manage and control market risk exposures within acceptable limits, while maximizing returns. The Company may use both financial derivatives and physical delivery sales contracts to manage market risks. All such transactions are conducted in accordance with a risk management policy as set out herein:

#### i. Interest rate risk

Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. The Company is exposed to interest rate fluctuations on its bank debt which bears interest at a floating rate. For the three months ended March 31, 2011, if interest rates had been 1% lower with all other variables held constant, earnings for the period would have been \$23,585 (2010 - \$15,411) higher, respectively, due to lower interest expense. An equal and opposite impact would have occurred had interest rates been higher by the same amounts. The Company had no interest rate swap or financial contracts in place at March 31, 2011.

#### ii. Currency risk

Foreign currency exchange rate risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in foreign exchange rates. All of the Company's petroleum and natural gas sales are denominated in Canadian dollars, however, the underlying market prices in Canada for petroleum and natural gas are impacted by changes in the exchange rate between the Canadian and United States dollar. The Company had no outstanding forward exchange rate contracts in place at March 31, 2011.

#### iii. Commodity price risk

Commodity price risk is the risk that the fair value or future cash flows will fluctuate as a result of changes in commodity prices. Commodity prices for petroleum and natural gas are impacted by world economic events that dictate the levels of supply and demand as well as the relationship between the Canadian and United States dollar, as outlined above.

## Capital disclosures

The Company's objective when managing capital is to maintain a flexible capital structure which will allow it to execute its capital expenditure program, which includes expenditures in oil and gas activities which may or may not be successful. Therefore, the Company monitors the level of risk incurred in its capital expenditures to balance the proportion of debt and equity in its capital structure.

The Company considers its capital structure to include shareholders equity:

	<i>March 31,</i> <i>2011</i>	<i>December 31,</i> <i>2010</i>
Shareholders' equity	\$ 64,023,392	\$ 47,835,896

---

**YANGARRA RESOURCES LTD.**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS**

For the three months ended March 31, 2011

The Company monitors capital based on annual funds from operations and capital expenditure budgets, which are updated as necessary and are reviewed and periodically approved by the Board of Directors.

The Company manages its capital structure and makes adjustments by continually monitoring its business conditions including the current economic conditions, the risk characteristics of the Company's petroleum and natural gas assets, the depth of its investment opportunities, current and forecasted net debt levels, current and forecasted commodity prices and other facts that influence commodity prices and funds from operations such as quality and basis differentials, royalties, operating costs and transportation costs.

In order to maintain or adjust the capital structure, the Company considers its forecasted funds from operations while attempting to finance an acceptable capital expenditure program including acquisition opportunities, the current level of bank credit available from the Company's lender, the level of bank credit that may be attainable from its lender as a result of petroleum and natural gas reserve growth, the availability of other sources of debt with different characteristics than existing debt, the sale of assets, limiting the size of the capital expenditure program and the issue of new equity if available on favorable terms. At March 31 2011, the Company's capital structure was not subject to external restrictions.

<sup>(1)</sup> Information has been presented in accordance with Canadian GAAP and has not been restated to IFRS

## **Business Risks and Uncertainties**

The Company is exposed to several operational risks inherent in exploring, developing, producing and marketing crude oil and natural gas. These inherent risks include: economic risk of finding and producing reserves at a reasonable cost; financial risk of marketing reserves at an acceptable price given current market conditions; cost of capital risk associated with securing the needed capital to carry out the Company's operations; risk of environment impact; and credit risk of non-payment for sales contracts and joint venture partners.

The Company attempts to control operating risks by maintaining a disciplined approach to implementation of its exploration and development programs. Exploration risks are managed by hiring experienced technical professionals and by concentrating the exploration activity on specific core regions that have multi-zone potential where the Company has experience and expertise. The Company also generates internal prospects and participates in projects where ownership interest is considered sufficient to minimize risk. Operational control allows the Company to manage costs, timing and sales of production and to ensure new production is brought on-stream in a timely manner.

The Company maintains a comprehensive insurance program to reduce risk to an acceptable level and to protect it against significant losses.

## **Environmental Risks**

All phases of the oil and natural gas business present environmental risks and hazards and are subject to environmental regulation pursuant to a variety of federal, provincial and local laws and regulations. Compliance with such legislation can require significant expenditures and a breach could result in the imposition of fines and penalties, some of which could be material. Senior management continually assesses new and existing regulatory requirements and environmental risks and determines the impact these risks might have on the Company, as well as the appropriate actions necessary to manage those risks. These assessments and the resulting policy decisions are discussed quarterly with the Board of Directors which evaluates the performance and effectiveness of the Company's environmental policies and programs.

The Company's environmental responsibilities includes removing property, plant and equipment as well as reclaiming land and property to its original state, subsequent to the completion of oil and natural gas extraction activities. This requirement results in an asset retirement obligation that provides current recognition of estimated expenditures that will be incurred in the future. The Company's decommissioning liabilities are discussed in further detail under "Critical Accounting Estimates" below, as well as in note 6 to the Company's Condensed Interim Consolidated Financial Statements.

## **Disclosure Controls and Procedures**

The Company's certifying officers will file a Venture Issuer Basic Certificate with respect to the information contained in its financial statements and respective accompanying Management's Discussion and Analysis. The Venture Issuer Basic Certification includes a 'Notice to Reader' stating that the certifying officers do not make any representations relating to the establishment and maintenance of disclosure controls and procedures and internal control over financial reporting, as defined in National Instrument 52-109 – Certification of Disclosure in Issuers' Annual and Interim Filings.

**YANGARRA RESOURCES LTD.**  
**MANAGEMENT'S DISCUSSION AND ANALYSIS**

For the three months ended March 31, 2011

---

## **Critical Accounting Estimates**

The preparation of the financial statements in accordance with IFRS requires management to make judgments, estimates and assumptions that affect reported amounts and presentation of assets, liabilities, revenues, expenses and disclosures of contingencies and commitments. Such estimates primarily relate to unsettled transactions and events at the statement of financial position date which are based on information available to management at each financial statement date. Actual results could differ from those estimated.

Judgments, estimates and assumptions are continuously evaluated and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

### Property and equipment

The Company capitalizes costs in connection with the development of its oil and gas projects. The measurement of these costs at each financial statement date requires estimates to be made with respect to equipment and drilling activities. The estimate of the percentage of completion of various projects at the financial statement date affects P&E additions and the related accrued liability. An increase in the measurement amount of these items would increase P&E and accrued liabilities accordingly.

### Reserves

Reserves and resources are used in the unit of production calculation for depletion and depreciation as well as impairment analysis. The quantity of reserves is subject to a number of estimates and projections including assessment of engineering data, projected future rates of production, commodity prices, regulatory changes, foreign exchange rates, operating costs and sustaining capital expenditures. These estimates and projections are uncertain as the Company does not have a long commercial production history to assist in the development of these forward-looking estimates. However, all reserve and associated financial information is evaluated and reported on by a firm of qualified independent reserve evaluators in accordance with the standards prescribed by applicable securities regulators.

The calculation of future cash flows based on these reserves is dependent on a number of estimates including: production volumes, facility performance, commodity prices, royalties, operating costs, sustaining capital, foreign exchange and tax rates. The price used in our assessment of future cash flows is based on the Company's independent evaluator's estimate of future prices and evaluated for reasonability by the Company against other available information. The Company believes these prices are reasonable estimates for a long-term outlook.

### Impairment

The Company assesses its P&E and E&E assets for possible impairment if there are events or changes in circumstances that indicate the carrying values of the assets may not be recoverable. Such indicators include changes in the Company's business plans, changes in commodity prices, evidence of physical damage and significant downward revisions to estimated recoverable volumes or increases in estimated future development expenditures.

The assessment for impairment for P&E and E&E assets involves comparing the carrying value of the CGU with the higher of value in use calculations and fair value less costs to sell. Determination as to whether and how much an asset is impaired involves management estimates on highly uncertain matters such as future commodity prices, the effects of inflation on operating expenses, discount rates, production profiles and the outlook for regional supply-and-demand conditions for crude oil, natural gas and liquids. Impairment is recognized in earnings in the period in which carrying amount exceeded the recoverable amount. The Company has not recognized an impairment as at March 31, 2011.

# **YANGARRA RESOURCES LTD.**

## **MANAGEMENT'S DISCUSSION AND ANALYSIS**

For the three months ended March 31, 2011

---

### Depletion and depreciation

Depletion of resource assets is measured over the life of proved and probable reserves on a unit-of-production basis and commences when the wells are substantially complete and after commercial production has begun. Reserve estimates and the associated future capital can have a significant impact on earnings, as these are key components to the calculation of depletion. A downward revision in the reserve estimate or an upward revision to future capital would result in increased depletion, reduced earnings and reduced carrying value of petroleum and natural gas property assets.

### Decommissioning liabilities

The Company measures decommissioning liabilities at each financial statement date. The estimate is based on the Company's share of costs to reclaim the resource assets and certain facilities related to the projects as well as other resource assets associated with future expansions. To determine the future value of the liability, estimates of the amount, timing and inflation of the associated abandonment costs are made. The present value of the cost is recorded as the decommissioning liability using a risk-free discount rate. Due to the long-term nature of current and future project developments, abandonment costs will be incurred many years in the future. As a result of these factors, different estimates could be used for such abandonment costs and the associated timing. Assumptions of higher future abandonment costs, regulatory changes, higher inflation, lower risk-free rates or an assumption of earlier or specified timing of abandonment would cause the decommissioning liability of the corresponding asset to increase. These changes would also cause future accretion expenses to increase and future earnings to decrease.

### Deferred taxes

Deferred income tax assets and liabilities are recognized for the estimated future tax consequences attributable to differences between the financial statement carrying amount and the tax basis of assets and liabilities. An estimate is required for both the timing and corresponding tax rate for this reversal. Should these estimates change, it may impact the measurement of the Company's assets or liabilities as well as deferred tax recovery or expense recognized to earnings. Where unfavorable evidence exists, additional considerations and evidence for recognition of deferred tax assets is required. The Company has applied management's judgment and evaluated applicable factors necessary in making this determination and has concluded that the positive evidence in consideration of the estimated future cash flows based on reserve reports from the Company's independent engineers, does not sufficiently outweigh negative factors. The Company only recognizes deferred tax assets arising from unused tax losses to the extent that the Company has sufficient taxable temporary differences or it is probable that sufficient taxable profit will be available against which the unused tax losses can be utilized. The Company has not recognized a deferred tax asset.

### Contingencies

By their nature, contingencies will only be resolved when one or more of the future events occur or fail to occur. The assessment of contingencies inherently involves the exercise of significant judgment and estimates of the outcome of future events.

### Other areas of estimates

The recognition of amounts in relation to stock-based compensation requires estimates related to valuation of stock options at the time of issuance. The fair value of foreign exchange contracts is calculated using valuation models that require estimates as to future market prices. By their nature, these estimates are subject to measurement uncertainty and the effect of changes in such estimates on the financial statements for current and future periods could be significant.

## **International Financial Reporting Standards ("IFRS")**

Effective January 1, 2011, International Financial Reporting Standards ("IFRS") have replaced Canadian GAAP for publicly accountable enterprises. The Company has adopted IFRS for the interim and annual periods beginning on January 1, 2011, including comparative information pertaining to 2010.

Information regarding the Company's accounting policies and transition to IFRS can be found in notes 1, 2 and 17 to the Condensed Interim Consolidated Financial Statements. Significant items to note upon transition include:

### Depletion and depreciation

Under IFRS, depletion of P&E properties is calculated at a unit-of-account level using proved and probable reserves as the basis, as opposed to using only proved reserves as was required practice under Canadian GAAP. This has resulted in significantly lower depletion under IFRS than under Canadian GAAP.

### Decommissioning liabilities

Under IFRS, the assumptions used in calculating asset retirement obligations are to be analyzed at each balance sheet date and updated to reflect current market conditions when appropriate. Due to the change recorded on January 1, 2010, resulting from the use of the risk-free rate as opposed to the credit-adjusted risk-free rate, the amount of accretion recorded under IFRS is lower than that recorded under Canadian GAAP. In addition, the Company has chosen to show accretion separately on its financial statements as opposed to including with depletion and depreciation, as was common practice under Canadian GAAP.

### Transition adjustments

At January 1, 2010, the assumptions used to calculate the decommissioning liabilities were altered to reflect current market conditions, as required under IFRS. The change resulted in an increase to the liability of \$755,065.

### Flow-through Shares

Flow-through shares are a Canadian tax incentive which is the subject of specific guidance under Canadian GAAP, however there is no specific guidance under IFRS. Under Canadian GAAP, when flow-through shares are issued they are recorded at face value. The related future tax liability is established for the tax effect of the difference between the tax basis and the book basis of the assets when renounced and is recorded as a reduction of share capital. There is no income statement effect associated with the issuance of these shares.

The Company has adopted a policy under IFRS where the proceeds from the offering are to be allocated between the sale of the shares and the sale of the tax benefit. The allocation is made based on the difference between the quoted market price of the existing shares and the amount an investor pays for the flow-through shares. A liability is established for this difference that is reversed upon renunciation of the tax benefit. The difference between this liability and the deferred tax liability is recorded as an income tax expense. This has resulted in a re-classification between deficit and share capital at January 1, 2010 of \$4,047,525.
