## **YANGARRA ANNOUNCES OPERATIONS UPDATE**

**April 8, 2008**  
**Calgary, Alberta**

**Yangarra Resources Ltd.** (“Yangarra” or “the Company”) (TSX Venture: “YAN”) is pleased to announce the successful drilling, completion and tie in of a Bow Island well (100% working interest) in the Medicine Hat area with average initial production of 480 mcf/d from the well since being tied in on March 24, 2008 . The Company plans to drill three additional wells targeting this Bow Island pool once road bans are lifted in the area. Two new pool tests are also planned for this drilling program which is expected to commence in mid May 2008, depending on weather conditions.

In the Jaslan area, the Company has successfully drilled and tested a new gas well (100% working interest). The well tested at a sustained rate of 900 mcf/d on a three day test. Yangarra plans to drill three additional wells in the area and install a new compression facility.

Yangarra also announces the resignation of Mr. Bob Weir as Vice-President, Engineering of the Company. Mr. Weir will remain as a director of Yangarra and remains a significant shareholder. We wish to thank Mr. Weir for his service to the Company and wish him well in his new endeavors.

For more information, please contact James Evaskevich President and CEO at 403-262-9558.

### **ADVISORY REGARDING OIL EQUIVALENT CONVERSIONS**

Natural gas has been converted to a barrel of oil equivalent (Boe) using 6,000 cubic feet (6 Mcf) of natural gas equal to one barrel of oil (6:1), unless otherwise stated. The Boe conversion ratio of 6 Mcf to 1 Bbl is based on an energy equivalency conversion method and does not represent a value equivalency; therefore Boe's may be misleading if used in isolation. References to natural gas liquids (“NGLs”) in this news release include condensate, propane, butane and ethane and one barrel of NGLs is considered to be equivalent to one barrel of crude oil equivalent (Boe).

### **ADVISORY REGARDING FORWARD-LOOKING STATEMENTS**

Certain information regarding Yangarra set forth in this news release, including management's assessment of future plans, operations and operational results may constitute forward-looking statements under applicable securities law and necessarily involve risks associated with oil and gas exploration, production, marketing and transportation such as loss of market, volatility of prices, currency fluctuations, imprecision of reserves estimates, environmental risks, competition from other producers and ability to access sufficient capital from internal and external sources. As a consequence, actual results may differ materially from those anticipated in the forward-looking statements.
